

**IN THE UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF CALIFORNIA**

**TERRANCE ROSA and RYAN  
WATSON**, individually and on behalf of  
all others similarly situated,

Plaintiffs,

v.

**BRIGHTLINE, INC.,**

Defendant.

Case No.

**CLASS ACTION COMPLAINT**

**JURY TRIAL DEMANDED**

---

Plaintiffs Terrance Rosa and Ryan Watson, individually and on behalf of all others similarly situated, bring this action against Brightline, Inc. (“Brightline”). The following allegations are based on Plaintiffs’ knowledge, investigations of counsel, facts of public record, and information and belief.

**NATURE OF THE ACTION**

1. Plaintiffs seek to hold Brightline responsible for the injuries Brightline inflicted on Plaintiffs and approximately 27,742<sup>1</sup> similarly situated persons (“Class Members”) due to Brightline’s impermissibly inadequate data security, which caused the personal information of Plaintiffs and those similarly situated to be exfiltrated by unauthorized access by cybercriminals (the “Data Breach” or “Breach”) between January 28, 2023 and January 30, 2023.<sup>2</sup> Upon information and belief, the cybercriminals who

---

<sup>1</sup> <https://apps.web.maine.gov/online/aeviewer/ME/40/0461b276-a513-41ae-a587-c06c971a7d9b.shtml> (last accessed April 18, 2023).

<sup>2</sup> *Id.*

perpetrated the Breach are a Russian linked hacker/ransomware group responsible for numerous other hacking events.<sup>3</sup>

2. The data that Brightline caused to be exfiltrated by cybercriminals were highly sensitive. Upon information and belief, the exfiltrated data included personal identifying information (“PII”) like individuals’ names, addresses, dates of birth, member identification numbers, date of health plan coverage, Social Security numbers, and/or employer names.

3. Upon information and belief, prior to and through the date of the Data Breach, Brightline obtained Plaintiffs’ and Class Members’ PII and PHI and then maintained that sensitive data in a negligent and/or reckless manner. As evidenced by the Data Breach, Brightline inadequately maintained its network, platform, and software—rendering these easy prey for cybercriminals.

4. Upon information and belief, the risk of the Data Breach was known to Brightline. Thus, Brightline was on notice that its inadequate data security created a heightened risk of exfiltration, compromise, and theft.

5. Then, after the Data Breach, Brightline failed to provide timely notice to the affected Plaintiffs and Class Members—thereby exacerbating their injuries. Ultimately, Brightline deprived Plaintiffs and Class Members of the chance to take speedy measures to protect themselves and mitigate harm. Simply put, Brightline impermissibly left

---

<sup>3</sup> <https://www.scmagazine.com/news/ransomware/clop-ransomware-hack-of-fortra-goanywhere-mft-hits-1m-chs-patients> (last accessed on April 5, 2023); <https://www.aha.org/news/headline/2023-02-23-hhs-russia-linked-ransomware-group-claims-continued-health-care-attacks> (last accessed on April 5, 2023).

Plaintiffs and Class Members in the dark—thereby causing their injuries to fester and the damage to spread.

6. Even when Brightline finally notified Plaintiffs and Class Members of their PII and PHI's exfiltration, Brightline failed to adequately describe the Data Breach and its effects.

7. Today, the identities of Plaintiffs and Class Members are in jeopardy—all because of Brightline's negligence. Plaintiffs and Class Members now suffer from a heightened and imminent risk of fraud and identity theft and must now constantly monitor their financial accounts.

8. Armed with the PII and PHI stolen in the Data Breach, criminals can commit a litany of crimes. Specifically, criminals can now open new financial accounts in Class Members' names, take out loans using Class Members' identities, use Class Members' names to obtain medical services, use Class Members' health information to craft phishing and other hacking attacks based on Class Members' individual health needs, use Class Members' identities to obtain government benefits, file fraudulent tax returns using Class Members' information, obtain driver's licenses in Class Members' names (but with another person's photograph), and give false information to police during an arrest.

9. And Plaintiffs and Class Members will likely suffer additional financial costs for purchasing necessary credit monitoring services, credit freezes, credit reports, or other protective measures to deter and detect identity theft.

10. Plaintiffs and Class Members have suffered—and will continue to suffer—from the loss of the benefit of their bargain, unexpected out-of-pocket expenses, lost or

diminished value of their PII and PHI, emotional distress, and the value of their time reasonably incurred to mitigate the fallout of the Data Breach.

11. Through this action, Plaintiffs seek to remedy these injuries on behalf of themselves and all similarly situated individuals whose PII and PHI were exfiltrated and compromised in the Data Breach.

12. Plaintiffs seek remedies including, but not limited to, compensatory damages, treble damages, punitive damages, reimbursement of out-of-pocket costs, and injunctive relief—including improvements to Brightline’s data security systems, future annual audits, and adequate credit monitoring services funded by Brightline.

### **PARTIES**

13. Plaintiff Terrance Rosa is a natural person and resident and citizen of Philadelphia. He has no intention of moving to a different state in the immediate future.

14. Plaintiff Ryan Watson is a natural person and a resident and citizen of Virginia. He has no intention of moving to a different state in the immediate future.

15. Defendant Brightline, Inc. is a Delaware corporation, with its principal place of business in San Mateo, California.

### **JURISDICTION AND VENUE**

16. This Court has original jurisdiction under the Class Action Fairness Act, 28 U.S.C. § 1332(d)(2), because this is a class action involving more than 100 putative class members and the amount in controversy exceeds \$5,000,000, exclusive of interest and

costs. And minimal diversity is established because Plaintiffs (and many members of the class) are citizens of states different than Brightline.

17. This Court has general personal jurisdiction over Brightline because Brightline's principal place of business and headquarters is in this District. Brightline also regularly conducts substantial business in this District.

18. Venue is proper in this District under 28 U.S.C. §§ 1391(a)(2), 1391(b)(2), and 1391(c)(2) because substantial part of the events giving rise to the claims emanated from activities within this District, and Brightline conducts substantial business in this District.

### **FACTUAL ALLEGATIONS**

#### ***Brightline Collected and Stored the PII and PHI of Plaintiffs and Class Members***

19. Founded in 2019, Brightline, Inc. is a technology and telehealth services company based in Palo Alto, California.<sup>4</sup>

20. Brightline employs more than 140 people and generates approximately \$20 million in annual revenue.<sup>5</sup>

21. Brightline services are available nationwide through select plan sponsors.<sup>6</sup>

22. Upon information and belief, Brightline received and maintained the PII and PHI of patients and employees of its clients, such as individuals' names, addresses, dates

---

<sup>4</sup> <https://www.jdsupra.com/legalnews/brightline-inc-announces-third-party-6211923/> (last visited April 18, 2023).

<sup>5</sup> *Id.*

<sup>6</sup> *Id.*

of birth, member identification numbers, date of health plan coverage, and/or employer names. These records are stored on Brightline's computer systems.

23. Upon information and belief, Brightline used Fortra, LLC ("Fortra") for information technology management and software services, including Fortra's file transfer platform, GoAnywhere MFT. Within this relationship, Brightline entrusted data, including Plaintiffs' and Class Members PII and PHI to Fortra.

24. On February 1, 2023, Fortra, LLC disclosed to its customers that its file transfer platform, GoAnywhere MFT, had been hacked, resulting the exfiltration of customer PII and PHI, including Plaintiffs' and Class Members PII and PHI. Brightline then reported that it was one of the affected customers whom Fortra had notified.

25. Because of the highly sensitive and personal nature of the information Brightline acquire and store, Brightline knew or reasonably should have known that it stored protected PII and PHI and must comply with healthcare industry standards related to data security and all federal and state laws protecting customers' and patients' PII and PHI, and provide adequate notice to customers if their PII or PHI is disclosed without proper authorization.

26. When Brightline collects this sensitive information, it promises to use reasonable measures to safeguard the PII and PHI from theft and misuse.

27. Brightline acquired, collected, and stored, and represented that it maintained reasonable security over Plaintiffs' and Class Members' PII and PHI.

28. By obtaining, collecting, receiving, and/or storing Plaintiffs' and Class Members' PII and PHI, Brightline assumed legal and equitable duties and knew, or

should have known, that it was thereafter responsible for protecting Plaintiffs' and Class Members' PII and PHI from unauthorized disclosure.

29. Brightline's Privacy Practices includes 22 purposes for which Brightline might use and disclose patients' medical information. None of those purposes encompass the disclosure of that information to cybercriminals.<sup>7</sup>

30. Brightline's Practices Policy states that, "The protection of your health information is very important to us."<sup>8</sup>

31. Brightline's Privacy Policy states, "Your Personal Information is not shared with third parties without your permission, except as described below."<sup>9</sup>

32. Brightline's Privacy Policy states, "We protect the security of the information you provide to us with reasonable and appropriate physical, electronic, and administrative safeguards. For certain features of our Services we use industry-standard SSL-encryption to enhance the security of data transmissions."<sup>10</sup>

33. Plaintiffs and Class Members have taken reasonable steps to maintain the confidentiality of their PII and PHI, including but not limited to, protecting their usernames and passwords, using only strong passwords for their accounts, and refraining from browsing potentially unsafe websites.

34. Upon information and belief, Plaintiffs and Class Members relied on Brightline to keep their PII and PHI confidential and securely maintained, to use this

<sup>7</sup> <https://www.hellobrightline.com/privacy-practices> (last visited April 18, 2023).

<sup>8</sup> *Id.*

<sup>9</sup> <https://www.hellobrightline.com/privacy-policy> (last visited April 18, 2023).

<sup>10</sup> *Id.*

information for business and healthcare purposes only, and to make only authorized disclosures of this information.

35. Brightline could have prevented or mitigated the effects of the Data Breach by better securing its network, properly encrypting its data, or better selecting its information technology partners.

36. Brightline's negligence in safeguarding Plaintiffs' and Class Members' PII and PHI was exacerbated by repeated warnings and alerts directed to protecting and securing sensitive data, as evidenced by the trending data breach attacks in recent years.

37. The healthcare industry in particular has experienced a large number of high-profile cyberattacks even in just the short period preceding the filing of this Complaint, and cyberattacks, generally, have become increasingly more common. More healthcare data breaches were reported in 2020 than in any other year, showing a 25% increase.<sup>11</sup> Additionally, according to the HIPAA Journal, the largest healthcare data breaches have been reported beginning in April 2021.<sup>12</sup>

38. In the context of data breaches, healthcare is "by far the most affected industry sector."<sup>13</sup> Further, cybersecurity breaches in the healthcare industry are particularly devastating, given the frequency of such breaches and the fact that healthcare

---

<sup>11</sup> *2020 Healthcare Data Breach Report*, HIPAA JOURNAL (Jan. 19, 2021) <https://www.hipaajournal.com/2020-healthcare-data-breach-report-us/>.

<sup>12</sup> *April 2021 Healthcare Data Breach Report*, HIPAA JOURNAL (May 18, 2021) <https://www.hipaajournal.com/april-2021-healthcare-data-breach-report/>.

<sup>13</sup> Tenable Security Response Team, *Healthcare Security*, TENABLE (Mar. 10, 2021), <https://www.tenable.com/blog/healthcare-security-ransomware-plays-a-prominent-role-in-covid-19-era-breaches>.

providers maintain highly sensitive and detailed PII.<sup>14</sup> And according to the cybersecurity firm Mimecast, 90% of healthcare organizations experienced cyberattacks in the past year.<sup>15</sup>

39. Despite the prevalence of public announcements of data breaches and data security compromises, Brightline failed to take appropriate steps to protect Plaintiffs' and Class Members' PII and PHI from being compromised.

40. Brightline failed to properly monitor and log the ingress and egress of network traffic.

41. Brightline failed to properly monitor and log file access and modifications.

42. Brightline failed to properly train its employees as to cybersecurity best practices.

43. Brightline failed to provide fair, reasonable, or adequate computer systems and data security practices to safeguard the PII and PHI of Plaintiffs and Class Members.

44. Brightline failed to timely and accurately disclose that Plaintiffs' and Class Members' PII and PHI had been improperly acquired or accessed.

45. Brightline knowingly disregarded standard information security principles, despite obvious risks, by allowing unmonitored and unrestricted access to unsecured PII and PHI.

---

<sup>14</sup> *See id.*

<sup>15</sup> *See* Maria Henriquez, *Iowa City Hospital Suffers Phishing Attack*, SECURITY MAGAZINE (Nov. 23, 2020), <https://www.securitymagazine.com/articles/93988-iowa-city-hospital-suffers-phishing-attack>.

46. Brightline failed to provide adequate supervision and oversight of the PII and PHI with which it was and is entrusted, in spite of the known risk and foreseeable likelihood of breach and misuse, which permitted an unknown third party to gather PII and PHI of Plaintiffs and Class Members, misuse the PHI/PII and potentially disclose it to others without consent.

47. Upon information and belief, Brightline failed to implement sufficient processes to quickly detect and respond to data breaches, security incidents, or intrusions.

48. Upon information and belief, Brightline failed to encrypt Plaintiffs' and Class Members' PII and PHI and monitor user behavior and activity to identify possible threats.

### ***The Data Breach***

49. On or about March of 2023, Brightline notified the public ("Notice of Data Breach" or "Notice") that its customers' data had been compromised in a Data Breach suffered by Fortra, and informed them of the following:

Brightline, a startup pediatric behavioral health provider, on behalf of certain entities identified below ("Covered Entities"), is informing impacted individuals about a security incident at its vendor, Fortra, that affected a limited amount of protected health information. Fortra is a third-party provider of file transfer services known as GoAnywhere MFT Software-as-a-Service. We received information from the Covered Entities concerning eligibility of certain individuals for our services and this information was stored in our account with Fortra.

What Happened: While Fortra's investigation is ongoing, we understand that on January 30, 2023, Fortra was made aware of suspicious activity within certain instances of its GoAnywhere MFT service. Through its investigation, Fortra states that it identified a previously-unknown vulnerability which an unauthorized party used to gain access to certain Fortra customers' accounts and download files, including ours.

Fortra informed us about the security vulnerability in their GoAnywhere MFT service on February 4, 2023. We took swift action the same day in response to the notice. Our investigation determined the incident was limited solely to the Fortra service and did not impact our own network. Fortra also promptly notified law enforcement and is cooperating with their investigation of the Fortra incident.

Subsequently, we determined that the unauthorized party acquired certain files that were saved in the Fortra service. After making this determination, we immediately began to analyze the files to determine which individuals and data had been affected. As part of that analysis, it was determined that those files contained a limited amount of protected health information. We then began notifying the Covered Entities of the incident.

What Information Was Involved: Based on the investigation, we identified a limited amount of protected health information/personal information in the files that the unauthorized party acquired, potentially including some combination of the following data elements: individuals' names, addresses, dates of birth, member identification numbers, date of health plan coverage, and/or employer names.<sup>16</sup>

50. Upon information and belief, the Notice of Data Breach was drafted and publicized under the direction of Fortra and Brightline.

51. Although the Data Breach began on January 28, 2023, it was not until January 30, 2021—two days later—that Brightline became aware of suspicious activity on their network.

52. Upon information and belief, Plaintiffs' and Class Members' PII and PHI was access, exfiltrated, and stolen in the Breach by a Russian linked hacker/ransomware group.<sup>17</sup>

---

<sup>16</sup> <https://www.hellobrightline.com/fortra-data-notice> (last accessed on April 18, 2023).

<sup>17</sup> <https://www.scmagazine.com/news/ransomware/clop-ransomware-hack-of-fortra-goanywhere-mft-hits-1m-chs-patients> (last accessed on April 5, 2023); <https://www.aha.org/news/headline/2023-02-23-hhs-russia-linked-ransomware-group-claims-continued-health-care-attacks> (last accessed on April 5, 2023).

53. Upon information and belief, the Data Breach affected over 130 organizations that use Fortra's file transfer platform called GoAnywhere.<sup>18</sup>

54. Upon information and belief, Brightline has sufficient control over its use of Fortra's file transfer platform GoAnywhere to properly secure Brightline's data that it sends over GoAnywhere.

55. Upon information and belief, Fortra's file transfer platform GoAnywhere is partially or fully maintained and hosted on Fortra's own network.<sup>19</sup>

56. Upon information and belief, Plaintiffs' and Class Members' affected PII and PHI was accessible, unencrypted, unprotected, and vulnerable for acquisition and/or exfiltration by unauthorized individuals.

57. It is likely the Data Breach was targeted at Fortra due to its status as large information technology provider to healthcare providers and other businesses that collect, create, and maintain both PII and PHI.

58. While Brightline claims to have become aware of the Breach as early as January of 2023, Brightline did not begin notifying some victims of the Data Breach until April of 2023—almost three months later.

---

<sup>18</sup> *Id.*

<sup>19</sup> [https://www.goanywhere.com/?code=CMP-0000002095&ls=717710011&utm\\_term=fortra%20goanywhere&utm\\_campaign=Brand+Search+Global%20BEN&utm\\_source=adwords&utm\\_medium=ppc&hsa\\_acc=7887499888&hsa\\_cam=16466321209&hsa\\_grp=135712580764&hsa\\_ad=488204485843&hsa\\_src=g&hsa\\_tgt=kwd-1956017997300&hsa\\_kw=fortra%20goanywhere&hsa\\_mt=e&hsa\\_net=adwords&hsa\\_ver=3&gclid=Cj0KCQjwuLShBhC\\_ARIsAFod4fLIy63LJVldjzwIajE5iD96oGqaTbA-yyDmML273CfUeLHVeZe9uTsaAiAPEALw\\_wcB](https://www.goanywhere.com/?code=CMP-0000002095&ls=717710011&utm_term=fortra%20goanywhere&utm_campaign=Brand+Search+Global%20BEN&utm_source=adwords&utm_medium=ppc&hsa_acc=7887499888&hsa_cam=16466321209&hsa_grp=135712580764&hsa_ad=488204485843&hsa_src=g&hsa_tgt=kwd-1956017997300&hsa_kw=fortra%20goanywhere&hsa_mt=e&hsa_net=adwords&hsa_ver=3&gclid=Cj0KCQjwuLShBhC_ARIsAFod4fLIy63LJVldjzwIajE5iD96oGqaTbA-yyDmML273CfUeLHVeZe9uTsaAiAPEALw_wcB) (last accessed on April 5, 2023).

59. Time is of the essence when highly sensitive PII and PHI is subject to unauthorized access and/or acquisition. The disclosed, accessed, and/or acquired PII and PHI of Plaintiffs and Class Members is likely available on the Dark Web. Hackers can access and then offer for sale the unencrypted, unredacted PII and PHI to criminals. Plaintiffs and Class Members are now subject to the present and continuing risk of fraud, identity theft, and misuse resulting from the possible publication of their PII and PHI onto the Dark Web. Plaintiffs and Class Members now face a lifetime risk of identity theft, which is heightened here by unauthorized access, disclosure, and/or activity by cybercriminals on computer systems containing sensitive personal information.

60. Following the Breach and recognizing that each Class Member is now subject to the present and continuing risk of identity theft and fraud, Brightline “advised impacted individuals of the steps outlined below that they can take to further protect themselves:

- a. Order Your Free Credit Report...
- b. Upon receiving your credit report, review it carefully...
- c. If you see anything you do not understand, call the credit bureau at the telephone number on the report. You should notify the credit bureaus of any inaccuracies in your report, whether due to error or fraud, as soon as possible so the information can be investigated and, if found to be in error, corrected. If there are accounts or charges you did not authorize, immediately notify the appropriate credit bureau by telephone and in writing. Information that

cannot be explained should also be reported to your local police or sheriff's office because it may signal criminal activity...

- d. If you believe you are the victim of identity theft or have reason to believe your personal information has been misused, you should immediately contact the Federal Trade Commission and/or the Attorney General's office in your home state, and local law enforcement. You may also contact these agencies for information on how to prevent or minimize the risks of identity theft...
- e. Placing a Security Freeze... [and]
- f. Placing a Fraud Alert.”<sup>20</sup>

61. Brightline also stated that, “We encourage you to take advantage of these protections and remain vigilant for incidents of fraud and identity theft, including regularly reviewing and monitoring your credit reports and account statements.”<sup>21</sup>

62. Brightline largely put the burden on Plaintiffs and Class Members to take measures to protect themselves.

63. Time is a compensable and valuable resource in the United States. According to the U.S. Bureau of Labor Statistics, 55.5% of U.S.-based workers are compensated on an hourly basis, while the other 44.5% are salaried.<sup>22</sup>

---

<sup>20</sup> <https://www.hellobrightline.com/fortra-data-notice> (last accessed April 18, 2023).

<sup>22</sup> *Characteristics of minimum wage workers, 2020*, U.S. BUREAU OF LABOR STATISTICS <https://www.bls.gov/opub/reports/minimum-wage/2020/home.htm#:~:text=In%202020%2C%2073.3%20million%20workers,wage%20of%20%247.25%20per%20hour> (last accessed Oct. 21, 2022); *Average Weekly Wage Data*, U.S. BUREAU OF LABOR STATISTICS, *Average Weekly Wage Data*, [https://data.bls.gov/cew/apps/table\\_maker/v4/table\\_maker.htm%23type=1&year=2021&qtr=3&own=5&ind=10&supp=0](https://data.bls.gov/cew/apps/table_maker/v4/table_maker.htm%23type=1&year=2021&qtr=3&own=5&ind=10&supp=0) (last accessed

64. According to the U.S. Bureau of Labor Statistics' 2018 American Time Use Survey, American adults have only 36 to 40 hours of "leisure time" outside of work per week;<sup>23</sup> leisure time is defined as time not occupied with work or chores and is "the time equivalent of 'disposable income.'"<sup>24</sup> Usually, this time can be spent at the option and choice of the consumer, however, having been notified of the Data Breach, consumers now have to spend hours of their leisure time self-monitoring their accounts, communicating with financial institutions and government entities, and placing other prophylactic measures in place to attempt to protect themselves.

65. Plaintiffs and Class Members are now deprived of the choice as to how to spend their valuable free hours and seek remuneration for the loss of valuable time as another element of damages.

66. Upon information and belief, the unauthorized third-party cybercriminals gained access to Plaintiffs' and Class Members' PII and PHI with the intent of engaging in misuse of the PII and PHI, including marketing and selling Plaintiffs' and Class Members' PII and PHI.

67. Brightline also offered credit monitoring services for a period of 24 months. Such measures, however, are insufficient to protect Plaintiffs and Class Members from the lifetime risks they each now face. As another element of damages, Plaintiffs and Class

---

Aug. 2, 2022) (finding that on average, private-sector workers make \$1,253 per 40-hour work week.).

<sup>23</sup> Cory Stieg, *You're spending your free time wrong — here's what to do to be happier and more successful*, CNBC <https://www.cnbc.com/2019/11/06/how-successful-people-spend-leisure-time-james-wallman.html> (Nov. 6, 2019).

<sup>24</sup> *Id.*

Members seek a sum of money sufficient to provide Plaintiffs and Class Members identity theft protection services for their respective lifetimes.

68. Brightline had and continues to have obligations created by HIPAA, reasonable industry standards, common law, state statutory law, and its own assurances and representations to keep Plaintiffs' and Class Members' PII and PHI confidential and to protect such PII and PHI from unauthorized access.

69. Brightline's Breach Notice letter, as well as its website notice, both omit the size and scope of the breach. Brightline has demonstrated a pattern of providing inadequate notices and disclosures about the Data Breach.

70. Plaintiffs and the Class Members remain, even today, in the dark regarding what particular data was stolen, the particular ransomware used, and what steps are being taken, if any, to secure their PII and PHI and financial information going forward. Plaintiffs and Class Members are left to speculate as to the full impact of the Data Breach and how exactly Brightline intends to enhance its information security systems and monitoring capabilities so as to prevent further breaches.

71. Plaintiffs' and Class Members' PII and PHI and financial information may end up for sale on the dark web, or simply fall into the hands of companies that will use the detailed PII and PHI and financial information for targeted marketing without the approval of Plaintiffs and/or Class Members. Either way, unauthorized individuals can now easily access the PII and PHI and/or financial information of Plaintiffs and Class Members.

***Brightline Failed to Comply with FTC Guidelines***

72. According to the Federal Trade Commission (“FTC”), the need for data security should be factored into all business decision-making.<sup>25</sup> To that end, the FTC has issued numerous guidelines identifying best data security practices that businesses, such as Brightline, should employ to protect against the unlawful exfiltration of PII and PHI.

73. In 2016, the FTC updated its publication, *Protecting Personal Information: A Guide for Business*, which established guidelines for fundamental data security principles and practices for business.<sup>26</sup> The guidelines explain that businesses should:

- a. protect the personal customer information that they keep;
- b. properly dispose of personal information that is no longer needed;
- c. encrypt information stored on computer networks;
- d. understand their network’s vulnerabilities; and
- e. implement policies to correct security problems.

74. The guidelines also recommend that businesses watch for large amounts of data being transmitted from the system and have a response plan ready in the event of a breach.

75. The FTC recommends that companies not maintain PII and PHI longer than is needed for authorization of a transaction; limit access to sensitive data; require complex passwords to be used on networks; use industry-tested methods for security; monitor for

---

<sup>25</sup> *Start with Security: A Guide for Business*, FED. TRADE COMM’N (June 2015), <https://bit.ly/3uSoYWF> (last accessed July 25, 2022).

<sup>26</sup> *Protecting Personal Information: A Guide for Business*, FED. TRADE COMM’N (Oct. 2016), <https://bit.ly/3u9mzre> (last accessed July 25, 2022).

suspicious activity on the network; and verify that third-party service providers have implemented reasonable security measures.<sup>27</sup>

76. The FTC has brought enforcement actions against businesses for failing to adequately and reasonably protect customer data, treating the failure to employ reasonable and appropriate measures to protect against unauthorized access to confidential consumer data as an unfair act or practice prohibited by Section 5 of the Federal Trade Commission Act (“FTCA”), 15 U.S.C. § 45. Orders resulting from these actions further clarify the measures businesses must take to meet their data security obligations.

77. These FTC enforcement actions include actions against healthcare providers and partners like Brightline. *See, e.g., In the Matter of Labmd, Inc., A Corp*, 2016-2 Trade Cas. (CCH) ¶ 79708, 2016 WL 4128215, at \*32 (MSNET July 28, 2016) (“[T]he Commission concludes that LabMD’s data security practices were unreasonable and constitute an unfair act or practice in violation of Section 5 of the FTC Act.”).

78. Brightline’s failure to employ reasonable and appropriate measures to protect against unauthorized access to patient PII and PHI constitutes an unfair act or practice prohibited by Section 5 of the FTCA, 15 U.S.C. § 45.

***Brightline Failed to Follow Industry Standards***

79. Despite its alleged commitments to securing sensitive patient data, Brightline does not follow industry standard practices in securing patients’ PII and PHI.

80. As shown above, experts studying cyber security routinely identify

---

<sup>27</sup> *See Start with Security, supra* note 46.

healthcare providers as being particularly vulnerable to cyberattacks because of the value of the PII and PHI which they collect and maintain.

81. Several best practices have been identified that at a minimum should be implemented by healthcare providers like Brightline, including but not limited to, educating all employees; strong passwords; multi-layer security, including firewalls, anti-virus, and anti-malware software; encryption, making data unreadable without a key; multi-factor authentication; backup data; and limiting which employees can access sensitive data.

82. Other best cybersecurity practices that are standard in the healthcare industry include installing appropriate malware detection software; monitoring and limiting the network ports; protecting web browsers and email management systems; setting up network systems such as firewalls, switches and routers; monitoring and protection of physical security systems; protection against any possible communication system; training staff regarding critical points.

83. Brightline failed to meet the minimum standards of any of the following frameworks: the NIST Cybersecurity Framework Version 1.1 (including without limitation PR.AC-1, PR.AC-3, PR.AC-4, PR.AC-5, PR.AC-6, PR.AC-7, PR.AT-1, PR.DS-1, PR.DS-5, PR.PT-1, PR.PT-3, DE.CM-1, DE.CM-4, DE.CM-7, DE.CM-8, and RS.CO-2), and the Center for Internet Security's Critical Security Controls (CIS CSC), which are all established standards in reasonable cybersecurity readiness.

84. Such frameworks are the existing and applicable industry standards in the healthcare industry. And Brightline failed to comply with these accepted standards, thus opening the door to criminals and the Data Breach.

***Brightline Violated HIPAA***

85. HIPAA circumscribes security provisions and data privacy responsibilities designed to keep patients' medical information safe. HIPAA compliance provisions, commonly known as the Administrative Simplification Rules, establish national standards for electronic transactions and code sets to maintain the privacy and security of protected health information.<sup>28</sup>

86. HIPAA provides specific privacy rules that require comprehensive administrative, physical, and technical safeguards to ensure the confidentiality, integrity, and security of PII and PHI is properly maintained.<sup>29</sup>

87. The Data Breach itself resulted from a combination of inadequacies showing Brightline failed to comply with safeguards mandated by HIPAA. Brightline's security failures include, but are not limited to:

- a. Failing to ensure the confidentiality and integrity of electronic PHI that it creates, receives, maintains and transmits in violation of 45 C.F.R. § 164.306(a)(1);

---

<sup>28</sup> HIPAA lists 18 types of information that qualify as PHI according to guidance from the Department of Health and Human Services Office for Civil Rights, and includes, *inter alia*: names, addresses, any dates including dates of birth, Social Security numbers, and medical record numbers.

<sup>29</sup> See 45 C.F.R. § 164.306 (security standards and general rules); 45 C.F.R. § 164.308 (administrative safeguards); 45 C.F.R. § 164.310 (physical safeguards); 45 C.F.R. § 164.312 (technical safeguards).

- b. Failing to protect against any reasonably-anticipated threats or hazards to the security or integrity of electronic PHI in violation of 45 C.F.R. § 164.306(a)(2);
- c. Failing to protect against any reasonably anticipated uses or disclosures of electronic PHI that are not permitted under the privacy rules regarding individually identifiable health information in violation of 45 C.F.R. § 164.306(a)(3);
- d. Failing to ensure compliance with HIPAA security standards by Brightline's workforce in violation of 45 C.F.R. § 164.306(a)(4);
- e. Failing to implement technical policies and procedures for electronic information systems that maintain electronic PHI to allow access only to those persons or software programs that have been granted access rights in violation of 45 C.F.R. § 164.312(a)(1);
- f. Failing to implement policies and procedures to prevent, detect, contain and correct security violations in violation of 45 C.F.R. § 164.308(a)(1);
- g. Failing to identify and respond to suspected or known security incidents and failing to mitigate, to the extent practicable, harmful effects of security incidents that are known to the covered entity in violation of 45 C.F.R. § 164.308(a)(6)(ii);
- h. Failing to effectively train all staff members on the policies and procedures with respect to PHI as necessary and appropriate for staff

members to carry out their functions and to maintain security of PHI in violation of 45 C.F.R. § 164.530(b) and 45 C.F.R. § 164.308(a)(5); and

- i. Failing to design, implement, and enforce policies and procedures establishing physical and administrative safeguards to reasonably safeguard PHI, in compliance with 45 C.F.R. § 164.530(c).

88. Simply put, the Data Breach resulted from a combination of insufficiencies that demonstrates Brightline failed to comply with safeguards mandated by HIPAA regulations.

***The Experiences and Injuries of Plaintiffs***

89. Plaintiffs and Class Members are the current and former patients of Brightline.

90. Plaintiffs and Class Members are employees of companies who use Brightline for delivering health services.

91. As a prerequisite of receiving treatment, Brightline requires its patients—like Plaintiffs and Class Members—to disclose their PII and PHI.

92. When Brightline finally announced the Data Breach, it deliberately underplayed the Breach's severity and obfuscated the nature of the Breach. Brightline's Breach Notice sent to patients fails to explain how the breach occurred (what security weakness was exploited), what exact data elements of each affected individual were compromised, who the Breach was perpetrated by, and the extent to which those data elements were compromised.

93. Because of the Data Breach, Brightline inflicted injuries upon Plaintiffs and Class Members. And yet, Brightline has done little to provide Plaintiffs and the Class Members with relief for the damages they suffered.

94. All the Plaintiffs were injured when Brightline caused their PII and PHI to be exfiltrated by cybercriminals.

95. Plaintiffs entrusted their PII and PHI to Brightline. Thus, Plaintiffs had the reasonable expectation and understanding that Brightline would take—at *minimum*—industry standard precautions to protect, maintain, and safeguard that information from unauthorized users or disclosure, and would timely notify them of any data security incidents. After all, Plaintiffs would not have entrusted their PII and PHI to any entity that used Brightline’s services had they known that Brightline would not take reasonable steps to safeguard their information.

96. Plaintiffs suffered actual injury from having their PII and PHI compromised in the Data Breach including, but not limited to, (a) damage to and diminution in the value of their PII and PHI—a form of property that Brightline obtained from Plaintiffs; (b) violation of their privacy rights; (c) the likely theft of their PII and PHI; (d) fraudulent activity resulting from the Breach; and (e) present and continuing injury arising from the increased risk of additional identity theft and fraud.

97. As a result of the Data Breach, Plaintiffs also suffered emotional distress because of the release of their PII and PHI—which they believed would be protected from unauthorized access and disclosure. Now, Plaintiffs suffer from anxiety about unauthorized

parties viewing, selling, and/or using their PII and PHI for nefarious purposes like identity theft and fraud.

98. Plaintiffs also suffer anxiety about unauthorized parties viewing, using, and/or publishing their information related to their medical records and prescriptions.

99. Because of the Data Breach, Plaintiffs have spent—and will continue to spend—considerable time and money to try to mitigate and address harms caused by the Data Breach.

***Plaintiff Rosa's Experience***

100. Plaintiff Rosa first learned of the Breach when he received a notice email (substantially similar to the Notice) from his employer on April 11, 2023.

101. Upon information and belief, Fortra obtained Plaintiff Rosa's PII and PHI from Brightline who Plaintiff Rosa's employer used for delivering health services.

102. Shortly after and as a result of the Data Breach, Plaintiff Rosa experienced an increase in spam and suspicious phone calls, texts, and emails.

103. As a result of the Data Breach and at the recommendation of Brightline and its Notice, Plaintiff Rosa made reasonable efforts to mitigate the impact of the Data Breach, including but not limited to researching the Data Breach, reviewing credit card and financial account statements, changing his online account passwords, and monitoring his credit information.

104. Plaintiff Rosa has spent significant time responding to the Data Breach and will continue to spend valuable time he otherwise would have spent on other activities,

including but not limited to work and/or recreation.

105. Plaintiff Rosa suffered lost time, annoyance, interference, and inconvenience as a result of the Data Breach and has experienced anxiety and increased concerns for the loss of his privacy, as well as anxiety over the impact of cybercriminals accessing and using his PII and PHI and/or financial information.

106. Plaintiff Rosa is now subject to the present and continuing risk of fraud, identity theft, and misuse resulting from their PII and PHI and financial information, in combination with their names, being placed in the hands of unauthorized third parties/criminals.

107. Plaintiff Rosa has a continuing interest in ensuring that their PII and PHI and financial information, which, upon information and belief, remains backed up in Brightline's possession, is protected and safeguarded from future breaches.

***Plaintiff Watson's Experience***

108. Plaintiff Watson first learned of the Breach when he reviewed a notice email (substantially similar to the Notice), which his employer set to him on April 11, 2023.

109. Upon information and belief, Fortra obtained Plaintiff Watson's PII and PHI from Brightline who Plaintiff Watson's employer used for delivering health services.

110. Shortly after and as a result of the Data Breach, Plaintiff Watson experienced an increase in spam and suspicious phone calls, texts, and emails. In particular, Plaintiff Watson received a fraudulent call where the caller attempted to elicit banking information from Plaintiff Watson. This caller pretended to be an Amazon representative who needed to verify his banking information for a pending delivery. In actuality, there was no pending

delivery as Plaintiff Watson had made no such purchase.

111. As a result of the Data Breach and at the recommendation of Brightline and its Notice, Plaintiff Watson made reasonable efforts to mitigate the impact of the Data Breach, including but not limited to researching the Data Breach, reviewing credit card and financial account statements, changing his online account passwords, and monitoring his credit information.

112. Plaintiff Watson has spent significant time responding to the Data Breach and will continue to spend valuable time he otherwise would have spent on other activities, including but not limited to work and/or recreation.

113. Plaintiff Watson suffered lost time, annoyance, interference, and inconvenience as a result of the Data Breach and has experienced anxiety and increased concerns for the loss of his privacy, as well as anxiety over the impact of cybercriminals accessing and using his PII and PHI and/or financial information.

114. Plaintiff Watson is now subject to the present and continuing risk of fraud, identity theft, and misuse resulting from their PII and PHI and financial information, in combination with their names, being placed in the hands of unauthorized third parties/criminals.

115. Plaintiff Watson has a continuing interest in ensuring that their PII and PHI and financial information, which, upon information and belief, remains backed up in Brightline's possession, is protected and safeguarded from future breaches.

***Plaintiffs and the Proposed Class Face Significant Risk of Present and Continuing Identity Theft***

116. Plaintiffs and Class Members suffered injury from the misuse of their PII and PHI that can be directly traced to Brightline.

117. The ramifications of Brightline's failure to keep Plaintiffs' and the Class's PII and PHI secure are severe. Identity theft occurs when someone uses another's personal and financial information such as that person's name, account number, Social Security number, driver's license number, date of birth, and/or other information, without permission, to commit fraud or other crimes.

118. According to experts, one out of four data breach notification recipients become a victim of identity fraud.<sup>30</sup>

119. As a result of Brightline's failures to prevent—and to timely detect—the Data Breach, Plaintiffs and Class Members suffered and will continue to suffer damages, including monetary losses, lost time, anxiety, and emotional distress. They have suffered or are at an increased risk of suffering:

- a. The loss of the opportunity to control how their PII and PHI is used;
- b. The diminution in value of their PII and PHI;
- c. The compromise and continuing publication of their PII and PHI;

---

<sup>30</sup> *More Than 12 Million Identity Fraud Victims in 2012 According to Latest Javelin Strategy & Research Report*, BUSINESSWIRE (Feb. 20, 2013) <https://threatpost.com/study-shows-one-four-who-receive-data-breach-letter-become-fraud-victims-022013/77549/>.

- d. Out-of-pocket costs associated with the prevention, detection, recovery, and remediation from identity theft or fraud;
- e. Lost opportunity costs and lost wages associated with the time and effort expended addressing and attempting to mitigate the actual and future consequences of the Data Breach, including, but not limited to, efforts spent researching how to prevent, detect, contest, and recover from identity theft and fraud;
- f. Delay in receipt of tax refund monies;
- g. Unauthorized use of stolen PII and PHI; and
- h. The continued risk to their PII and PHI, which remains in the possession of Brightline and is subject to further breaches so long as Brightline fails to undertake the appropriate measures to protect the PII and PHI in their possession.

120. Stolen PII and PHI is one of the most valuable commodities on the criminal information black market. According to Experian, a credit-monitoring service, stolen PII and PHI can be worth up to \$1,000.00 depending on the type of information obtained.<sup>31</sup>

121. The value of Plaintiffs' and the proposed Class's PII and PHI on the black market is considerable. Stolen PII and PHI trades on the black market for years, and criminals frequently post stolen private information openly and directly on various "dark

---

<sup>31</sup> Brian Stack, *Here's How Much Your Personal Information Is Selling for on the Dark Web*, EXPERIAN (Dec. 6, 2017) <https://www.experian.com/blogs/ask-experian/heres-how-much-your-personal-information-is-selling-for-on-the-dark-web/>.

web” internet websites, making the information publicly available, for a substantial fee of course.

122. It can take victims years to spot or identify PII and PHI theft, giving criminals plenty of time to milk that information for cash.

123. One such example of criminals using PII and PHI for profit is the development of “Fullz” packages.<sup>32</sup>

124. Cyber-criminals can cross-reference two sources of PII and PHI to marry unregulated data available elsewhere to criminally stolen data with an astonishingly complete scope and degree of accuracy in order to assemble complete dossiers on individuals. These dossiers are known as “Fullz” packages.

125. The development of “Fullz” packages means that stolen PII and PHI from the Data Breach can easily be used to link and identify it to Plaintiff’s and the proposed Class’s phone numbers, email addresses, and other unregulated sources and identifiers. In other words, even if certain information such as emails, phone numbers, or credit card numbers may not be included in the PII and PHI stolen by the cyber-criminals in the Data

---

<sup>32</sup> “Fullz” is fraudster-speak for data that includes the information of the victim, including, but not limited to, the name, address, credit card information, social security number, date of birth, and more. As a rule of thumb, the more information you have on a victim, the more money can be made off those credentials. Fullz are usually pricier than standard credit card credentials, commanding up to \$100 per record or more on the dark web. Fullz can be cashed out (turning credentials into money) in various ways, including performing bank transactions over the phone with the required authentication details in-hand. Even “dead Fullz”, which are Fullz credentials associated with credit cards that are no longer valid, can still be used for numerous purposes, including tax refund scams, ordering credit cards on behalf of the victim, or opening a “mule account” (an account that will accept a fraudulent money transfer from a compromised account) without the victim’s knowledge. *See, e.g.,* Brian Krebs, *Medical Records For Sale in Underground Stolen From Texas Life Insurance Firm*, KREBS ON SECURITY, (Sep. 18, 2014) <https://krebsonsecurity.com/tag/fullz/>.

Breach, criminals can easily create a Fullz package and sell it at a higher price to unscrupulous operators and criminals (such as illegal and scam telemarketers) over and over. That is exactly what is happening to Plaintiffs and members of the proposed Class, and it is reasonable for any trier of fact, including this Court or a jury, to find that Plaintiff's and other members of the proposed Class's stolen PII and PHI is being misused, and that such misuse is fairly traceable to the Data Breach.

126. According to the FBI's Internet Crime Complaint Center (IC3) 2019 Internet Crime Report, Internet-enabled crimes reached their highest number of complaints and dollar losses that year, resulting in more than \$3.5 billion in losses to individuals and business victims.

127. Further, according to the same report, "rapid reporting can help law enforcement stop fraudulent transactions before a victim loses the money for good." Brightline did not rapidly report to Plaintiffs and the Class that their PII and PHI had been stolen.

128. Victims of identity theft also often suffer embarrassment, blackmail, or harassment in person or online, and/or experience financial losses resulting from fraudulently opened accounts or misuse of existing accounts.

129. In addition to out-of-pocket expenses that can exceed thousands of dollars and the emotional toll identity theft can take, some victims have to spend a considerable time repairing the damage caused by the theft of their PII and PHI. Victims of new account identity theft will likely have to spend time correcting fraudulent information in their credit

reports and continuously monitor their reports for future inaccuracies, close existing bank/credit accounts, open new ones, and dispute charges with creditors.

130. Further complicating the issues faced by victims of identity theft, data thieves may wait years before attempting to use the stolen PII and PHI. To protect themselves, Plaintiffs and the Class will need to remain vigilant against unauthorized data use for years or even decades to come.

131. The Federal Trade Commission (“FTC”) has also recognized that consumer data is a new and valuable form of currency. In an FTC roundtable presentation, former Commissioner Pamela Jones Harbour stated that “most consumers cannot begin to comprehend the types and amount of information collected by businesses, or why their information may be commercially valuable. Data is currency.”<sup>33</sup>

132. The FTC has also issued numerous guidelines for businesses that highlight the importance of reasonable data security practices. The FTC has noted the need to factor data security into all business decision-making.<sup>34</sup> According to the FTC, data security requires: (1) encrypting information stored on computer networks; (2) retaining payment card information only as long as necessary; (3) properly disposing of personal information that is no longer needed; (4) limiting administrative access to business systems; (5) using industry-tested and accepted methods for securing data; (6) monitoring activity on

---

<sup>33</sup> *Commissioner Pamela Jones Harbour: Remarks Before FTC Exploring Privacy Roundtable*, FED. TRADE COMMISSION (Dec. 7, 2009), [https://www.ftc.gov/sites/default/files/documents/public\\_statements/remarks-ftc-exploring-privacy-roundtable/091207privacyroundtable.pdf](https://www.ftc.gov/sites/default/files/documents/public_statements/remarks-ftc-exploring-privacy-roundtable/091207privacyroundtable.pdf).

<sup>34</sup> *Start With Security, A Guide for Business*, FED. TRADE COMMISSION, <https://www.ftc.gov/system/files/documents/plain-language/pdf0205-startwithsecurity.pdf> (last visited Oct. 21, 2022).

networks to uncover unapproved activity; (7) verifying that privacy and security features function properly; (8) testing for common vulnerabilities; and (9) updating and patching third-party software.<sup>35</sup>

133. According to the FTC, unauthorized PII and PHI disclosures are extremely damaging to consumers' finances, credit history and reputation, and can take time, money, and patience to resolve the fallout.<sup>36</sup> The FTC treats the failure to employ reasonable and appropriate measures to protect against unauthorized access to confidential consumer data as an unfair act or practice prohibited by Section 5(a) of the FTC Act (the "FTCA").

134. To that end, the FTC has issued orders against businesses that failed to employ reasonable measures to secure sensitive payment card data. *See In the matter of Lookout Services, Inc.*, No. C-4326, ¶ 7 (June 15, 2011) ("[Brightline] allowed users to bypass authentication procedures" and "failed to employ sufficient measures to detect and prevent unauthorized access to computer networks, such as employing an intrusion detection system and monitoring system logs."); *In the matter of DSW, Inc.*, No. C-4157, ¶ 7 (Mar. 7, 2006) ("[Brightline] failed to employ sufficient measures to detect unauthorized access."); *In the matter of The TJX Cos., Inc.*, No. C-4227 (Jul. 29, 2008) ("[R]espondent stored . . . personal information obtained to verify checks and process unreceipted returns in clear text on its in-store and corporate networks[,] "did not require network administrators . . . to use different passwords to access different programs,

<sup>35</sup> *Id.*

<sup>36</sup> *See Taking Charge, What to Do If Your Identity is Stolen*, FED. TRADE COMMISSION, at 3 (2012), <https://www.ojp.gov/ncjrs/virtual-library/abstracts/taking-charge-what-do-if-your-identity-stolen>.

computers, and networks[.]” and “failed to employ sufficient measures to detect and prevent unauthorized access to computer networks . . .”); *In the matter of Dave & Buster’s Inc.*, No. C-4291 (May 20, 2010) (“[Brightline] failed to monitor and filter outbound traffic from its networks to identify and block export of sensitive personal information without authorization” and “failed to use readily available security measures to limit access between instore networks . . .”). These orders, which all preceded the Data Breach, further clarify the measures businesses must take to meet their data security obligations. Brightline thus knew or should have known that its data security protocols were inadequate and were likely to result in the unauthorized access to and/or theft of PII and PHI.

135. The healthcare industry is a prime target for data breaches.

136. Over the past several years, data breaches have become alarmingly commonplace. In 2016, the number of data breaches in the U.S. exceeded 1,000, a 40% increase from 2015.<sup>37</sup> The next year, that number increased by nearly 45%.<sup>38</sup> The following year the healthcare sector was the second easiest “mark” among all major sectors and categorically had the most widespread exposure per data breach.<sup>39</sup>

137. Data breaches within the healthcare industry continued to increase rapidly. According to the 2019 Healthcare Information and Management Systems Society

---

<sup>37</sup> *Data Breaches Increase 40 Percent in 2016, Finds New Report From Identity Theft Resource Center and CyberScout*, IDENTITY THEFT RESOURCE CENTER (Jan. 19, 2017), <https://bit.ly/30Gew91> [hereinafter “*Data Breaches Increase 40 Percent in 2016*”].

<sup>38</sup> *Data Breaches Up Nearly 45 Percent According to Annual Review by Identity Theft Resource Center® and CyberScout®*, IDENTITY THEFT RESOURCE CENTER (Jan. 22, 2018), <https://bit.ly/3jdGcYR> [hereinafter “*Data Breaches Up Nearly 45 Percent*”].

<sup>39</sup> *2018 End-of-Year Data Breach Report*, IDENTITY THEFT RESOURCE CENTER (Feb. 20, 2019), [https://www.idtheftcenter.org/wp-content/uploads/2019/02/ITRC\\_2018-End-of-Year-Aftermath\\_FINAL\\_V2\\_combinedWEB.pdf](https://www.idtheftcenter.org/wp-content/uploads/2019/02/ITRC_2018-End-of-Year-Aftermath_FINAL_V2_combinedWEB.pdf).

Cybersecurity Survey, 68% of participating vendors reported having a significant security incident within the last 12 months, with a majority of those being caused by “bad actors.”<sup>40</sup>

138. The healthcare sector reported the second largest number of breaches among all measured sectors in 2018, with the highest rate of exposure per breach.<sup>41</sup> Indeed, when compromised, healthcare-related data is among the most sensitive and personally consequential. A report focusing on healthcare breaches found that the “average total cost to resolve an identity theft-related incident . . . came to about \$20,000,” and that the victims were often forced to pay out-of-pocket costs for healthcare they did not receive in order to restore coverage.<sup>42</sup> Almost 50 percent of the victims lost their healthcare coverage as a result of the incident, while nearly 30 percent said their insurance premiums went up after the event. Forty percent of the customers were never able to resolve their identity theft at all. Data breaches and identity theft have a crippling effect on individuals and detrimentally impact the economy as a whole.<sup>43</sup>

139. The healthcare industry has “emerged as a primary target because [it sits] on a gold mine of sensitive personally identifiable information for thousands of patients at any given time. From social security and insurance policies to next of kin and credit cards, no

<sup>43</sup> *Id.*

other organization, including credit bureaus, ha[s] so much monetizable information stored in their data centers.”<sup>44</sup>

140. Charged with handling highly sensitive PII and PHI including healthcare information, financial information, and insurance information, Brightline knew or should have known the importance of safeguarding the PII and PHI that was entrusted to it. Brightline also knew or should have known of the foreseeable consequences if its data security systems were breached. This includes the significant costs that would be imposed on Brightline’s customers’ patients as a result of a breach. Brightline nevertheless failed to take adequate cybersecurity measures to prevent the Data Breach from occurring.

141. Brightline disclosed the PII and PHI of Plaintiffs and members of the proposed Class for criminals to use in the conduct of criminal activity. Specifically, Brightline opened, disclosed, and failed to adequately protect the PII and PHI of Plaintiffs and members of the proposed Class to people engaged in disruptive and unlawful business practices and tactics, including online account hacking, unauthorized use of financial accounts, and fraudulent attempts to open unauthorized financial accounts (i.e., identity fraud), all using the stolen PII and PHI.

142. Brightline’s use of outdated and insecure computer systems and software that are easy to hack, and its failure to maintain adequate security measures and an up-to-date technology security strategy, demonstrates a willful and conscious disregard for privacy, and has failed to adequately protect the PII and PHI of Plaintiffs and potentially thousands

---

<sup>44</sup> Eyal Benishti, *How to Safeguard Hospital Data from Email Spoofing Attacks*, INSIDE DIGITAL HEALTH (Apr. 4, 2019), <https://bit.ly/3x6fz08>.

of members of the proposed Class to unscrupulous operators, con artists, and outright criminals.

143. Brightline's failure to properly notify Plaintiffs and members of the proposed Class of the Data Breach exacerbated Plaintiffs' and members of the proposed Class's injury by depriving them of the earliest ability to take appropriate measures to protect their PII and PHI and take other necessary steps to mitigate the harm caused by the Data Breach.

### **CLASS ACTION ALLEGATIONS**

144. Plaintiffs bring this action on behalf of themselves and on behalf of all other persons similarly situated ("the Class") under Fed. R. Civ. P. 23(b)(2), 23(b)(3), and 23(c)(4).

145. Plaintiffs proposes the following Class definitions, subject to amendment as appropriate:

All persons residing in the United States whose PII or PHI was impacted by the Data Breach—including all persons that Brightline sent a notice of the Data Breach to (the "Class").

146. The Class defined above is readily ascertainable from information in Brightline's possession. Thus, such identification of Class Members will be reliable and administratively feasible.

147. Excluded from the Class are: (1) any judge or magistrate presiding over this action and members of their families; (2) Brightline, Brightline's subsidiaries, parents, successors, predecessors, affiliated entities, and any entity in which Brightline or their parent has a controlling interest, and their current or former officers and directors; (3)

persons who properly execute and file a timely request for exclusion from the Class; (4) persons whose claims in this matter have been finally adjudicated on the merits or otherwise released; (5) Plaintiffs' counsel and Brightline's counsel; (6) members of the jury; and (7) the legal representatives, successors, and assigns of any such excluded persons.

148. Plaintiffs reserve the right to amend or modify the Class definition—including potential Subclasses—as this case progresses.

149. Plaintiffs satisfy the numerosity, commonality, typicality, and adequacy requirements under Fed. R. Civ. P. 23.

150. **Numerosity**. The Class Members are numerous such that joinder is impracticable. While the exact number of Class Members is unknown to Plaintiffs at this time, based on information and belief, the Class consists of the approximately one million individuals whose PII and PHI were compromised by Brightline's Data Breach.

151. **Commonality**. There are many questions of law and fact common to the Class. And these common questions predominate over any individualized questions of individual Class Members. These common questions of law and fact include, without limitation:

- a. If Brightline unlawfully used, maintained, lost, or disclosed Plaintiffs' and Class Members' PII and PHI;
- b. If Brightline failed to implement and maintain reasonable security procedures and practices appropriate to the nature and scope of the information compromised in the Data Breach;

- c. If Brightline's data security systems prior to and during the Data Breach complied with applicable data security laws and regulations including, *e.g.*, HIPAA;
- d. If Brightline's data security systems prior to and during the Data Breach were consistent with industry standards;
- e. If Brightline owed a duty to Class Members to safeguard their PII and PHI;
- f. If Brightline breached its duty to Class Members to safeguard their PII and PHI;
- g. If Brightline knew or should have known that its data security systems and monitoring processes were deficient;
- h. If Brightline should have discovered the Data Breach earlier;
- i. If Brightline took reasonable measures to determine the extent of the Data Breach after it was discovered;
- j. If Brightline's delay in informing Plaintiffs and Class Members of the Data Breach was unreasonable;
- k. If Brightline's method of informing Plaintiffs and Class Members of the Data Breach was unreasonable;
- l. If Brightline's conduct was negligent;
- m. If Plaintiff and Class Members were injured as a proximate cause or result of the Data Breach;

- n. If Plaintiffs and Class Members suffered legally cognizable damages as a result of Brightline's misconduct;
- o. If Brightline breached implied contracts with Plaintiffs and Class Members;
- p. If Brightline was unjustly enriched by unlawfully retaining a benefit conferred upon them by Plaintiffs and Class Members;
- q. If Brightline failed to provide notice of the Data Breach in a timely manner; and
- r. If Plaintiffs and Class Members are entitled to damages, civil penalties, punitive damages, treble damages, and/or injunctive relief.

152. **Typicality**. Plaintiffs' claims are typical of those of other Class Members because Plaintiffs' information, like that of every other Class Member, was compromised in the Data Breach. Moreover, all Plaintiffs and Class Members were subjected to Brightline's uniformly illegal and impermissible conduct.

153. **Adequacy of Representation**. Plaintiffs will fairly and adequately represent and protect the interests of the Members of the Class. Plaintiffs' Counsel are competent and experienced in litigating complex class actions. Plaintiffs have no interests that conflict with, or are antagonistic to, those of the Class.

154. **Predominance**. Brightline has engaged in a common course of conduct toward Plaintiffs and Class Members, in that all the Plaintiffs and Class Members' data was stored on the same network system and unlawfully and inadequately protected in the

same way. The common issues arising from Brightline's conduct affecting Class Members set out above predominate over any individualized issues. Adjudication of these common issues in a single action has important and desirable advantages of judicial economy.

155. **Superiority**. A class action is superior to other available methods for the fair and efficient adjudication of the controversy. Class treatment of common questions of law and fact is superior to multiple individual actions or piecemeal litigation. Absent a class action, most Class Members would likely find that the cost of litigating their individual claims is prohibitively high and would therefore have no effective remedy. The prosecution of separate actions by individual Class Members would create a risk of inconsistent or varying adjudications with respect to individual Class Members, which would establish incompatible standards of conduct for Brightline. In contrast, the conduct of this action as a Class action presents far fewer management difficulties, conserves judicial resources, the parties' resources, and protects the rights of each Class Member.

156. The litigation of the claims brought herein is manageable. Brightline's uniform conduct, the consistent provisions of the relevant laws, and the ascertainable identities of Class Members demonstrates that there would be no significant manageability problems with prosecuting this lawsuit as a class action.

157. Adequate notice can be given to Class Members directly using information maintained in Brightline's records.

158. Likewise, particular issues under Rule 23(c)(4) are appropriate for certification because such claims present only particular, common issues, the resolution of

which would advance the disposition of this matter and the parties' interests therein. Such particular issues include those set forth above.

159. Brightline has acted on grounds that apply generally to the Class as a whole, so that Class certification, injunctive relief, and corresponding declaratory relief are appropriate on a Class-wide basis.

**FIRST CAUSE OF ACTION**  
**Negligence**  
**(On Behalf of Plaintiffs and the Class)**

160. Plaintiffs re-allege and incorporate by reference paragraphs 1-159 of the Complaint as if fully set forth herein.

161. Brightline required its customers to submit Plaintiffs' and Class Members' non-public PII and PHI to receive Brightline's services.

162. By collecting and storing this data in their computer system and network, and sharing it and using it for commercial gain, Brightline owed a duty of care to use reasonable means to secure and safeguard their computer system—and Plaintiffs' and Class Members' PII and PHI held within it—to prevent disclosure of the information, and to safeguard the information from theft. Brightline's duty included a responsibility to implement processes so they could detect a breach of its security systems in a reasonably expeditious period of time and to give prompt notice to those affected in the case of a data breach.

163. The risk that unauthorized persons would attempt to gain access to the PII and PHI and misuse it was foreseeable. Given that Brightline holds vast amounts of PII and PHI, it was inevitable that unauthorized individuals would at some point try to access Brightline's databases of PII and PHI.

164. After all, PII and PHI is highly valuable, and Brightline knew, or should have known, the risk in obtaining, using, handling, emailing, and storing the PII and PHI of Plaintiffs and Class Members. Thus, Brightline knew, or should have known, the importance of exercising reasonable care in handling the PII and PHI entrusted to them.

165. Brightline owed a duty of care to Plaintiffs and Class Members to provide data security consistent with industry standards and other requirements discussed herein, and to ensure that their systems and networks, and the personnel responsible for them, adequately protected the PII and PHI.

166. Brightline's duty of care to use reasonable security measures arose because of the special relationship that existed between Brightline and patients, which is recognized by laws and regulations including but not limited to HIPAA, as well as common law. Brightline was in a superior position to ensure that its systems were sufficient to protect against the foreseeable risk of harm to Class Members from a data breach.

167. Brightline failed to take appropriate measures to protect the PII and PHI of Plaintiffs and the Class. Brightline is morally culpable, given the prominence of security breaches in the healthcare industry. Any purported safeguards that Brightline had in place were wholly inadequate.

168. Brightline breached its duty to exercise reasonable care in safeguarding and protecting Plaintiffs' and the Class members' PII and PHI by failing to adopt, implement, and maintain adequate security measures to safeguard that information, despite known data breaches in the healthcare industry, and allowing unauthorized access to Plaintiffs' and the other Class Members' PII and PHI.

169. The failure of Brightline to comply with industry and federal regulations evinces Brightline's negligence in failing to exercise reasonable care in safeguarding and protecting Plaintiffs' and Class Members' PII and PHI.

170. But for Brightline's wrongful and negligent breach of their duties to Plaintiffs and the Classes, patients' PII and PHI would not have been compromised, stolen, and viewed by unauthorized persons. Brightline's negligence was a direct and legal cause of the theft of the PII and PHI of Plaintiffs and the Classes and all resulting damages.

171. The injury and harm suffered by Plaintiffs and Class Members was the reasonably foreseeable result of Brightline's failure to exercise reasonable care in safeguarding and protecting Plaintiffs' and the other Class members' PII and PHI. Brightline knew or should have known that their systems and technologies for processing and securing the PII and PHI of Plaintiffs and the Classes had security vulnerabilities.

172. As a result of this misconduct by Brightline, the PII, PHI, and other sensitive information of Plaintiffs and the Classes was compromised, placing them at a greater risk of identity theft and their PII and PHI being disclosed to third parties without the consent of Plaintiffs and the Classes

**SECOND CAUSE OF ACTION**  
**Negligence *Per Se***  
**(On Behalf of Plaintiffs and the Class)**

173. Plaintiffs re-allege and incorporate by reference paragraphs 1-159 of the Complaint as if fully set forth herein.

174. Under HIPAA, Brightline had a duty to use reasonable security measures to "reasonably protect" confidential data from "any intentional or unintentional use or

disclosure” and to “have in place appropriate administrative, technical, and physical safeguards to protect the privacy of protected health information.”<sup>45</sup> Some or all of the medical information at issue in this case constitutes “protected health information” within the meaning of HIPAA.<sup>46</sup>

175. Moreover, under HIPAA, Brightline had a duty to render the electronic PII and PHI that it maintained as unusable, unreadable, or indecipherable to unauthorized individuals. Specifically, the HIPAA Security Rule requires “the use of an algorithmic process to transform data into a form in which there is a low probability of assigning meaning without use of a confidential process or key.”<sup>47</sup>

176. Plaintiffs and Class Members are within the class of persons that the HIPAA was intended to protect. And the injuries that Brightline inflicted on Plaintiffs and Class Members are precisely the harms that HIPAA guards against. After all, the Federal Health and Human Services’ Office for Civil Rights (“OCR”) has pursued enforcement actions against businesses which—because of their failure to employ reasonable data security measures for PHI— caused the very same injuries that Brightline inflicted upon Plaintiffs and Class Members.

177. Under § 17932 of the Health Information Technology for Economic and Clinical Health Act (“HITECH”), Brightline have duty to promptly notify “without unreasonable delay and in no case later than 60 calendar days after the discovery of a

---

<sup>45</sup> 45 C.F.R. § 164.530(c)(1).

<sup>46</sup> *Id.*

<sup>47</sup> 45 C.F.R. § 164.304 (defining encryption).

breach” the respective covered entities and affected persons so that the entities and persons can take action to protect themselves.<sup>48</sup>

178. Moreover, § 17932(a) of HITECH states that, “[a] covered entity that accesses, maintains, retains, modifies, records, stores, destroys, or otherwise holds, uses, or discloses unsecured protected health information (as defined in subsection (h)(1)) shall, in the case of a breach of such information that is discovered by the covered entity, notify each individual whose unsecured protected health information has been, or is reasonably believed by the covered entity to have been, accessed, acquired, or disclosed as a result of such breach.”

179. And § 17932(b) of HITECH states that, “[a] business associate of a covered entity that accesses, maintains, retains, modifies, records, stores, destroys, or otherwise holds, uses, or discloses unsecured protected health information shall, following the discovery of a breach of such information, notify the covered entity of such breach. Such notice shall include the identification of each individual whose unsecured protected health information has been or is reasonably believed by the business associate to have been, accessed, acquired, or disclosed during such breach.”

180. Under the Federal Trade Commission Act, Brightline had a duty to employ reasonable security measures. Specifically, this statute prohibits “unfair . . . practices in or affecting commerce,” including (as interpreted and enforced by the FTC) the unfair practice of failing to use reasonable measures to protect confidential data.<sup>49</sup>

---

<sup>48</sup> 42 U.S.C.A. § 17932(d)(1).

<sup>49</sup> 15 U.S.C. § 45.

181. Moreover, Plaintiffs and Class Members' injuries are precisely the type of injuries that the FTCA guards against. After all, the FTC has pursued numerous enforcement actions against businesses that—because of their failure to employ reasonable data security measures and avoid unfair and deceptive practices—caused the very same injuries that Brightline inflicted upon Plaintiffs and Class Members.

182. Brightline's duty to use reasonable care in protecting confidential data arose not only because of the statutes and regulations described above, but also because Brightline are bound by industry standards to protect confidential PII and PHI.

183. Brightline owed Plaintiffs and Class Members a duty to notify them within a reasonable time frame of any breach to their PII and PHI. Brightline also owed a duty to timely and accurately disclose to Plaintiffs and Class Members the scope, nature, and occurrence of the Data Breach. This duty is necessary for Plaintiffs and Class Members to take appropriate measures to protect their PII and PHI, to be vigilant in the face of an increased risk of harm, and to take other necessary steps in an effort to mitigate the fallout of Brightline's Data Breach.

184. Brightline owed these duties to Plaintiffs and Class Members because they are members of a well-defined, foreseeable, and probable class of individuals whom Brightline knew or should have known would suffer injury-in-fact from its inadequate security protocols. After all, Brightline actively sought and obtained the PII and PHI of Plaintiffs and Class Members.

185. Brightline breached their duties, and thus were negligent, by failing to use reasonable measures to protect Plaintiffs' and Class Members' PII and PHI. And but for

Brightline's negligence, Plaintiffs and Class Members would not have been injured. The specific negligent acts and omissions committed by Brightline include, but are not limited to:

- a. Failing to adopt, implement, and maintain adequate security measures to safeguard Class Members' PII and PHI;
- b. Failing to comply with—and thus violating—HIPAA and its regulations;
- c. Failing to comply with—and thus violating—HITECH and its regulations;
- d. Failing to comply with—and thus violating—FTCA and its regulations;
- e. Failing to adequately monitor the security of its networks and systems;
- f. Failing to have in place mitigation policies and procedures;
- g. Allowing unauthorized access to Class Members' PII and PHI;
- h. Failing to detect in a timely manner that Class Members' PII and PHI had been compromised; and
- i. Failing to timely notify Class Members about the Data Breach so that they could take appropriate steps to mitigate the potential for identity theft and other damages.

186. It was foreseeable that Brightline's failure to use reasonable measures to protect Class Members' PII and PHI would result in injury to Class Members. Furthermore,

the breach of security was reasonably foreseeable given the known high frequency of cyberattacks and data breaches in the healthcare industry. It was therefore foreseeable that the failure to adequately safeguard Class Members' PII and PHI would result in one or more types of injuries to Class Members.

187. Simply put, Brightline's negligence actually and proximately caused Plaintiffs and Class Members actual, tangible, injuries-in-fact and damages. These injuries include, but are not limited to, the theft of their PII and PHI by criminals, improper disclosure of their PII and PHI, lost benefit of their bargain, lost value of their PII and PHI, and lost time and money incurred to mitigate and remediate the effects of the Data Breach that resulted from and were caused by Brightline's negligence. Moreover, injuries-in-fact and damages are ongoing, imminent, and immediate.

188. Plaintiff and Class Members are entitled to compensatory and consequential damages suffered because of the Data Breach.

189. Plaintiff and Class Members are also entitled to injunctive relief requiring Brightline to, *e.g.*, (1) strengthen their data security systems and monitoring procedures; (2) submit to future annual audits of those systems and monitoring procedures; and (3) continue to provide adequate credit monitoring to all Class Members for the remainders of their lives.

**THIRD CAUSE OF ACTION**  
**Unjust Enrichment**  
**(On Behalf of Plaintiffs and the Class)**

190. Plaintiffs re-allege and incorporate by reference paragraphs 1-159 of the Complaint as if fully set forth herein.

191. This cause of action is plead in the alternative to the breach of implied contract theory.

192. Plaintiffs and Class Members conferred a monetary benefit on Brightline, by paying money for healthcare services that relied on Brightline to render certain services, a portion of which was intended to have been used by Brightline for data security measures to secure Plaintiffs and Class Members' PII and PHI. Plaintiffs and Class Members further conferred a benefit on Brightline by entrusting their PII and PHI to Brightline from which Brightline derived profits.

193. Brightline enriched themselves by saving the costs it reasonably should have expended on data security measures to secure Plaintiffs and Class Members' PII and PHI. Instead of providing a reasonable level of security that would have prevented the Data Breach, Brightline instead calculated to avoid their data security obligations at the expense of Plaintiff and Class Members by utilizing cheaper, ineffective security measures. Plaintiffs and Class Members, on the other hand, suffered as a direct and proximate result of Brightline's failure to provide adequate security.

194. Under the principles of equity and good conscience, Brightline should not be permitted to retain the money belonging to Plaintiffs and Class Members, because Brightline failed to implement appropriate data management and security measures that are mandated by industry standards.

195. Brightline acquired the monetary benefit, PII, and PHI through inequitable means in that Brightline failed to disclose the inadequate security practices, previously alleged, and failed to maintain adequate data security.

196. If Plaintiffs and Class Members knew that Brightline had not secured their PII and PHI, they would not have agreed to give their money—or disclosed their data—to Brightline or Brightline’s customers.

197. Plaintiffs and Class Members have no adequate remedy at law.

198. As a direct and proximate result of Brightline’s conduct, Plaintiffs and Class Members have suffered—and will continue to suffer—a host of injuries, including but not limited to: (1) actual identity theft; (2) the loss of the opportunity to determine how their PII and PHI is used; (3) the compromise, publication, and/or theft of their PII and PHI; (4) out-of-pocket expenses associated with the prevention, detection, and recovery from identity theft, and/or unauthorized use of their PII and PHI; (5) lost opportunity costs associated with effort expended and the loss of productivity addressing and attempting to mitigate the actual and future consequences of the Data Breach, including but not limited to efforts spent researching how to prevent, detect, contest, and recover from identity theft; (6) the continued risk to their PII and PHI, which remain in Brightline’s possession and is subject to further unauthorized disclosures so long as Brightline fails to undertake appropriate and adequate measures to protect the PII and PHI in their possession; and (7) future expenditures of time, effort, and money that will be spent trying to prevent, detect, contest, and repair the impact of Brightline’s Data Breach.

199. As a direct and proximate result of Brightline’s conduct, Plaintiffs and Class Members suffered—and will continue to suffer—other forms of injury and/or harm.

200. Brightline should be compelled to disgorge into a common fund or constructive trust, for the benefit of Plaintiffs and Class Members, proceeds that they unjustly received from Plaintiffs and Class Members.

**FOURTH CAUSE OF ACTION**  
**Breach of Implied Contract**  
**(On Behalf of Plaintiffs and the Class)**

201. Plaintiffs re-allege and incorporate by reference paragraphs 1-159 of the Complaint as if fully set forth herein.

202. Defendant required Plaintiffs and the Class to provide and entrust their PII/PHI and financial information as a condition of obtaining services from Brightline.

203. Plaintiffs and the Class paid money to Brightline in exchange for goods and services, as well as Brightline's promises to protect their protected health information and other PII and PHI from unauthorized disclosure.

204. Brightline promised to comply with HIPAA standards and to make sure that Plaintiffs' and Class Members' PII and PHI would remain protected.

205. Through its course of conduct, Brightline, Plaintiffs, and Class Members entered into implied contracts for Brightline to implement data security adequate to safeguard and protect the privacy of Plaintiffs' and Class Members' PHI and PII and financial information.

206. Brightline solicited and invited Plaintiffs and Class Members to provide their PHI/PII and financial information as part of Brightline's regular business practices. Plaintiffs and Class Members accepted Brightline's offers and provided their PHI/PII and financial information to Brightline.

207. As a condition of being direct customers/patients of Brightline, Plaintiffs and Class Members provided and entrusted their PHI/PII and financial information to Brightline. In so doing, Plaintiffs and Class Members entered into implied contracts with Brightline by which Brightline agreed to safeguard and protect such non-public information, to keep such information secure and confidential, and to timely and accurately notify Plaintiffs and Class Members if its data had been breached and compromised or stolen.

208. A meeting of the minds occurred when Plaintiffs and Class Members agreed to, and did, provide its PHI/PII and financial information to Brightline, in exchange for, amongst other things, the protection of its PHI/PII and financial information.

209. Plaintiffs and Class Members fully performed their obligations under the implied contracts with Brightline.

210. Brightline breached the implied contracts it made with Plaintiffs and Class Members by failing to safeguard and protect their PHI/PII and financial information and by failing to provide timely and accurate notice to them that their PHI/PII and financial information was compromised as a result of the Data Breach.

211. Brightline further breached the implied contracts with Plaintiffs and Class Members by failing to comply with its promise to abide by HIPAA.

212. Brightline further breached the implied contracts with Plaintiffs and Class Members by failing to ensure the confidentiality and integrity of electronic protected health information Brightline created, received, maintained, and transmitted in violation of 45 CFR 164.306(a)(1).

213. Brightline further breached the implied contracts with Plaintiffs and Class Members by failing to implement policies and procedures to prevent, detect, contain, and correct security violations in violation of 45 CFR 164.308(a)(1).

214. Brightline further breached the implied contracts with Plaintiffs and Class Members by failing to protect against any reasonably anticipated threats or hazards to the security or integrity of electronic protected health information in violation of 45 CFR 164.306(a)(2).

215. Brightline's failures to meet these promises constitute breaches of the implied contracts.

216. Furthermore, the failure to meet its confidentiality and privacy obligations resulted in Brightline providing goods and services to Plaintiffs and Class Members that were of a diminished value.

217. As a direct and proximate result of Brightline's above-described breach of implied contract, Plaintiffs and Class Members have suffered (and will continue to suffer) (a) ongoing, imminent, and impending threat of identity theft crimes, fraud, and abuse, resulting in monetary loss and economic harm; (b) actual identity theft crimes, fraud, and abuse, resulting in monetary loss and economic harm; (c) loss of the confidentiality of the stolen confidential data; (d) the illegal sale of the compromised data on the dark web; (e) lost work time; and (f) other economic and non-economic harm.

218. As a result of Brightline's breach of implied contract, Plaintiffs and the Class Members are entitled to and demand actual, consequential, and nominal damages.

**PRAYER FOR RELIEF**

WHEREFORE Plaintiffs, on behalf of themselves and all others similarly situated, request the following relief:

- A. An Order certifying this action as a class action and appointing Plaintiffs as Class representatives and the undersigned as Class counsel;
- B. A mandatory injunction directing Brightline to adequately safeguard the PII and PHI of Plaintiffs and the Class hereinafter by implementing improved security procedures and measures, including but not limited to an Order:
  - i. prohibiting Brightline from engaging in the wrongful and unlawful acts described herein;
  - ii. requiring Brightline to protect, including through encryption, all data collected through the course of business in accordance with all applicable regulations, industry standards, and federal, state or local laws;
  - iii. requiring Brightline to delete and purge the PII and PHI of Plaintiffs and Class Members unless Brightline can provide to the Court reasonable justification for the retention and use of such information when weighed against the privacy interests of Plaintiffs and Class Members;
  - iv. requiring Brightline to implement and maintain a comprehensive Information Security Program designed to protect the confidentiality and integrity of Plaintiffs' and Class Members' PII and PHI;
  - v. requiring Brightline to engage independent third-party security auditors

and internal personnel to run automated security monitoring, simulated attacks, penetration tests, and audits on Brightline's systems on a periodic basis;

- vi. prohibiting Brightline from maintaining Plaintiffs' and Class Members' PII and PHI on a cloud-based database until proper safeguards and processes are implemented;
- vii. requiring Brightline to segment data by creating firewalls and access controls so that, if one area of Brightline's network is compromised, hackers cannot gain access to other portions of Brightline's systems;
- viii. requiring Brightline to conduct regular database scanning and securing checks;
- ix. requiring Brightline to monitor ingress and egress of all network traffic;
- x. requiring Brightline to establish an information security training program that includes at least annual information security training for all employees, with additional training to be provided as appropriate based upon the employees' respective responsibilities with handling PII and PHI, as well as protecting the PII and PHI of Plaintiffs and Class Members;
- xi. requiring Brightline to implement a system of tests to assess their respective employees' knowledge of the education programs

discussed in the preceding subparagraphs, as well as randomly and periodically testing employees' compliance with Brightline's policies, programs, and systems for protecting personal identifying information;

xii. requiring Brightline to implement, maintain, review, and revise as necessary a threat management program to appropriately monitor Brightline's networks for internal and external threats, and assess whether monitoring tools are properly configured, tested, and updated; and

xiii. requiring Brightline to meaningfully educate all Class Members about the threats that they face because of the loss of its confidential personal identifying information to third parties, as well as the steps affected individuals must take to protect themselves.

- C. A mandatory injunction requiring that Brightline provide notice to each member of the Class relating to the full nature and extent of the Data Breach and the disclosure of PII and PHI to unauthorized persons;
- D. Enjoining Brightline from further deceptive practices and making untrue statements about the Data Breach and the stolen PII and PHI;
- E. An award of damages, including actual, nominal, consequential damages, and punitive, as allowed by law in an amount to be determined;
- F. An award of attorneys' fees, costs, and litigation expenses, as allowed by law;

- G. An award of pre- and post-judgment interest, costs, attorneys' fees, expenses, and interest as permitted by law;
- H. Granting the Plaintiffs and the Class leave to amend this Complaint to conform to the evidence produced at trial;
- I. For all other Orders, findings, and determinations identified and sought in this Complaint; and
- J. Such other and further relief as this court may deem just and proper.

**JURY TRIAL DEMANDED**

Under Federal Rule of Civil Procedure 38(b), Plaintiffs demand a trial by jury for any and all issues in this action so triable as of right.
